PROFESSIONAL SUMMARY

Product-minded Flutter and Backend Developer with 3+ years of experience owning mobile products end to end — from architecture and API design through UI implementation, deployment, and post-launch iteration. Lead Developer at Qatfa Code, delivering client software across e-commerce, healthcare, fitness, on-demand marketplaces, and POS systems, with apps reaching 50,000+ combined active users. Builds full-stack, not just the client: comfortable designing REST APIs and databases in Node.js/Express/Prisma/PostgreSQL and Supabase, alongside native Kotlin/Android work, and leads projects from initial product design through production release rather than handing off requirements to someone else.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Kotlin, Android Studio, Xcode

Backend & Databases: Node.js, Express, Prisma, PostgreSQL, MongoDB, Supabase, REST API design, Firebase (Auth, FCM, Dynamic Links)

State Management: Cubit, Bloc, Provider, GetX, Riverpod

Architecture & Product: Clean Architecture, MVVM, OOP, SOLID Principles, Design Patterns, end-to-end product ownership (design → build → deploy → iterate)

APIs & Integration: RESTful APIs, Postman, Swagger, Google Maps, Mapbox, Payment Integration (Paylink)

Tools & DevOps: Git, GitHub, GitHub Actions, Hostinger deployment, VS Code, Cursor, Windsurf, Claude Code, Open Code, Antigravity

Languages: Arabic (Native), English (Professional Working Proficiency)

WORK EXPERIENCE

Lead Developer | Qatfa Code, Remote

2025 – Present

- Own client mobile and web products end to end: requirements, architecture, backend and API design, Flutter implementation, and production deployment.
- Led AROX, an on-demand services marketplace (client, craftsman, and admin apps) with a Node.js REST API backend, real-time bidding/chat, and commission billing.
- Built Mazid Mart, a full-stack e-commerce app for silver products, using Flutter with a Supabase backend covering authentication, cart, and order management.

Flutter Developer | Icon Tech, Alexandria, EG

Sep 2024 – Mar 2025 | Mar 2026 – Present (Mar 2025–Mar 2026: mandatory military service)

- Developed and maintained cross-platform mobile applications for a diverse range of clients across iOS and Android.
- Collaborated with designers and backend teams to deliver polished UI/UX and seamless API integrations.
- Delivered production apps including Eldalel, Nottr, AL Melhem, PharmaShop, Meras Gym, and AlShateer (see Projects).

Flutter Developer | Queue Company, Remote

Oct 2023 – Aug 2024

- Built and maintained cross-platform mobile and web applications for a software development firm specializing in scalable digital products.
- Developed the Request on-demand app suite (client, store, and order management apps) using Flutter, MVVM, GetX, and FCM.

TEACHING & COMMUNITY LEADERSHIP

Flutter Instructor | Easy Way Academy, Alexandria, EG | Jul 2024 – Mar 2025

- Designed and delivered a Flutter curriculum covering Dart, state management, API integration, and real-world project workflows.

Flutter Instructor | Black Horses, Alexandria, EG | Dec 2023 – Jun 2024

- Delivered specialized training on advanced topics including state management and clean architecture.

Flutter Instructor (Head of Community) | GDSC – Kafr El Sheikh University | Oct 2023 – Jun 2024

- Led the Flutter community track, providing technical training and mentoring to university students.

Flutter Developer (Volunteer) | UCCD – Kafr El Sheikh University | Jan 2023 – Oct 2023

- Volunteered to develop faculty workflow systems, enhancing administrative processes through mobile technology.

FEATURED PROJECTS

AROX — On-Demand Services Marketplace | Full-stack, led design to production | [Play Store](#) • [App Store](#)

- Led the product from design through production: client app, craftsman app, and Admin Dashboard for user and task management.
- Designed and built the REST API backend in Node.js, hosted on Hostinger, covering auth, bidding, chat, billing, and dispute-resolution flows.
- Integrated interactive Google Maps for real-time discovery of nearby craftsmen and available tasks.
- Engineered complex business logic: open-bidding, real-time chat, subscription/commission billing, and dispute resolution.
- Implemented Firebase Cloud Messaging for real-time push notifications across all three apps.
- Tech: Flutter, Dart, Bloc/Cubit, Node.js, REST API, Firebase (FCM), Google Maps, Clean Architecture.

Mazid Mart (E-Commerce) | Full-stack | [Play Store](#) • [App Store](#) • [Admin \(Play\)](#) • [Admin \(App Store\)](#)

- Built a production-ready e-commerce app for silver products using Clean Architecture: Flutter mobile app + Supabase backend REST APIs.
- Implemented authentication, shopping cart, order management, and FCM push notifications.

Eldalel | 50,000+ active users | [Play Store](#) • [App Store](#)

- Led UI redesign and delivered the 'Dalel El Waza2ef' feature; improved app performance and stability.
- Tech: Flutter, Provider, Riverpod, FCM.

PharmaShop | [Play Store](#) • [App Store](#)

- Implemented real-time chat and prescription-scanning for seamless medicine ordering.

Meras Gym | [Play Store](#) • [App Store](#)

- Built a gym management app: subscriptions, session scheduling, online/cash payments (Paylink), QR-based coach-to-user registration.

Nottr | [Play Store](#) • [App Store](#)

- Redesigned UI and integrated ZATCA-compliant QR code generation for invoicing.

AL Melhem | [Play Store](#) • [App Store](#)

- Delivered a new version with refreshed UI, enhanced features, and measurable performance improvements.

AlShateer | [Play Store](#)

- Optimized image caching and refined UI animations for significantly reduced load times.

AlBaraka | 1,000+ active users | [Play Store](#) • [Dashboard](#)

- Enhanced app stability and implemented a force-update mechanism; added dynamic social media integration.
- Tech: Kotlin, Android Studio.

LORD – HR | 1,000+ active users | [Play Store](#)

- Built an HR app from scratch with role-based access, salary viewing, document upload, news, and push notifications. Designed a simple user-friendly UI for older non-technical employees

QR Menu | SaaS Digital Menu Platform (Flutter Web) | [Themes](#)

- Built a digital menu platform for restaurants and cafes with six customizable themes, distance calculation, multiple payment methods, and multiple ordering options. Owners manage menus live from a dashboard, and customers access them through a QR code.

Request (On-Demand App Suite) | 1,000+ active users | [Play Store – Client](#) • [Play Store – Store](#) • [App Store](#)

- Architected a multi-app on-demand platform (client, store, order management) using MVVM and GetX.

Aupos | Point of Sale — distributed as APK

- Built a POS app for transaction management, inventory tracking, sales reporting, and receipt printing.

EDUCATION & CERTIFICATIONS

Bachelor of Computer Science — Kafr Elsheikh University (KSU), 2024

Flutter Advanced Course – Bloc and MVVM Pattern

Flutter Clean Architecture

The Complete Flutter & Dart Development Course (2022)
