Queue Company Remote

Oct 2023 – Aug 2024

- Software development firm specializing in web and mobile applications.

Flutter Instructor

Black Horses Alexandria

Dec 2023 – Jun 2024

- Instructor at Black Horses, providing specialized training and education.

Flutter Instructor

GDSC KafrElshihk

Oct 2023 – Jun 2024

- Head of Community, providing specialized training and education.

Flutter Developer

UCCD KafrElshihk

Jan 2023 – Oct2023

- Volunteered at UCCD, developing faculty work systems for the university

PROJECTS

Eldalel

- Contributed to the development of a new version of the app, featuring an updated user interface and the addition of key functionalities, including the "dalel elwaz2ef" feature, optimized performance.
- Technologies used: Flutter, Provider, Riverpod, FCM, GitHub, Android Studio
- **Play Store Link:** - https://play.google.com/store/apps/details?id=com.icontds.a7sn_wa7ed
- **App Store Link:** - [Eldalel](#)

Nottr

- Contributed to the development of a new app version by redesigning the user interface, enhancing core functionality, and optimizing overall performance and adding **ZATCA** QR.
- Technologies used: Flutter, Provider, GitHub, Android Studio, Xcode, Cursor
- **Play Store Link:** - https://play.google.com/store/apps/details?id=com.icontds.nottr_client
- **App Store Link:** - [Nottr](#)

AL Melhem

- Played a key role in developing a new app version with a refreshed user interface, enhanced key functionalities, and significant performance improvements.
- Technologies used: Flutter, Cubit, FCM, GitHub, Android Studio, Xcode
- **Play Store Link:** - <https://play.google.com/store/apps/details?id=com.almelhem.icontds>
- **App Store Link:** - [AL Melhem](#)

PharmaShop

- Contributed to enhancing the PharmaShop app by improving overall performance, refining UI animations, and ensuring a smoother user experience.
- Implemented new features including a real-time chat system and prescription scanning functionality to enable seamless medicine ordering.
- Utilized technologies including Flutter, Cubit, FCM, GitHub, Android Studio, and Xcode.
- **Play Store Link:** - <https://play.google.com/store/apps/details?id=com.icontech.pharmacy>
- **App Store Link:** - [PharmaShop](#)

Meras

- Developed a gym app with package subscriptions, session scheduling, online and cash payments, and QR scanning for coaches to register users, featuring dedicated user and coach interfaces.
- Technologies used: Flutter, Provider, Paylink payment, GitHub, Android Studio, Xcode, Windsurf
- **Play Store Link:** - <https://play.google.com/store/apps/details?id=com.icontds.merasgym>
- **App Store Link:** - [Meras](#)

AlShateer

- Optimized the AlShateer app by improving image handling, implementing efficient caching, and enhancing overall performance using Flutter and Provider.
- Delivered a smooth and responsive user experience by refining UI animations, accelerating load times, and applying advanced performance optimization techniques with GitHub.
- **Play Store Link:** - <https://play.google.com/store/apps/details?id=com.alshateer.icontds&pli=1>

Request

- Coded Dart and Flutter framework using MVVM, FCM, GetX.
- Used: GitHub, VS Code, Android Studio.
- **Play Store Link:** - <https://play.google.com/store/apps/details?id=com.Request.request>
- https://play.google.com/store/apps/details?id=com.RequestStore.request_store&pli=1
- https://play.google.com/store/apps/details?id=com.Requestorder.request_order
- **App Store Link:** - [Request](#)

Mazid Mart

- Developed a production-ready e-commerce mobile application for silver products, delivering a scalable and user-friendly experience using Flutter and Cubit.
- Engineered a full-stack solution including mobile app and backend APIs using Supabase and REST APIs, following Clean Architecture principles.
- Implemented key features such as authentication, shopping cart, order management, push notifications, and optimized UI performance for production readiness using FCM and GitHub.
- **Play Store Link:** - https://play.google.com/store/apps/details?id=com.qatfa.mazid_silver_customer
- https://play.google.com/store/apps/details?id=com.qatfa.mazid_silver_admin

AlBarka

- Contributed to the development of the AlBaraka app using Kotlin, focusing on enhancing app stability and user experience.
- Implemented new features including a force update mechanism to ensure users access the latest version, and dynamic handling of social media integrations.
- Utilized technologies including Kotlin, Android Studio, and GitHub.
- **Play Store Link:** - <https://play.google.com/store/apps/details?id=com.techcubics.albarkahyper>
- <https://play.google.com/store/apps/details?id=com.techcubics.albarkahyperdashboard>

Aupos:

- A point of sales application that allows businesses to manage transactions, track inventory, and generate sales reports efficiently, and print receipt. (distributed as APK)

COURSES & CERTIFICATES

- Flutter Advanced Course Bloc and MVVM Pattern
- Flutter Clean Architecture
- The Complete 2022 Flutter & Dart Development Course

TECHNICAL SKILLS

Flutter Framework:

- State management (Cubit, Bloc, Provider, GetX)
- Firebase (Authentication, Dynamic Link, console)
- RESTAPI & postman & swagger
- Animation & Local Storage
- Maps (Google maps, Map Box)

General Concepts:

- OOP & Design Patterns
- Algorithm & Data Structure
- Git & GitHub
- Skilled AI Tools Utilization

PERSONAL SKILLS

- Language (Arabic, English)
- Team Working
